

## Key Holder Responsibilities

*With privilege comes responsibility.*

- Having a gate key requires the WRPC member to assume responsibility for the security of the property once they open the gate.
- A member is not obliged to receive a gate key.
- Only one key is issued per membership type.
- A member in good standing may acquire a key to the gate upon completion of a range orientation and commitment to following the range rules.
- At the end of the membership year the locks on the gate are changed.
- A new year gate key will be issued to the member who maintains their membership in good standing through continuous annual renewal.
- If the membership lapses for a year, another range orientation will be required before a gate key is again issued.
- Members are requested to turn in their old key at the end of the membership year. This helps to keep operational costs low as keys and locks will be re-issued on a random schedule.
- A fee may be charged for lost keys.

**Once your membership has been processed, sign up for the next scheduled orientation by sending a note to [secretary@wrpc.ca](mailto:secretary@wrpc.ca).**

Whitehorse Rifle & Pistol Club is a members only, non-profit Society operated by a volunteer Board of Directors.

Members in good standing and all user groups are expected to follow the rules and regulations of the organization and take care of the facility.

### The Whitehorse Rifle & Pistol Club:

- Maintains a safe and appropriate place for individuals, families and community organizations to participate in the shooting sports,
- Encourages the development of safe and responsible shooting practices,
- Promotes recreational and competitive target shooting in the various shooting disciplines,
- Facilitates opportunities for education, instruction and training in the safe use of firearms.

## Whitehorse Rifle & Pistol Club Range Usage

Firearms, Ammo, Targets,  
Key Holder Responsibilities

# Range Venues, Firearms, Ammunition & Targets

Located on Grey Mountain Road WRPC maintains 6 outdoor range areas and one indoor range to accommodate a variety of shooting disciplines and firearms usage.

Range topography and ballistic tables are used to determine restrictions on calibers, ammunition and target materials that can be used. Each range venue is licensed for a specific type of firearm, and caliber. Targets are designed for specific shooting disciplines and firearms. Using the wrong firearm in a particular range area can result in unnecessary damage to the targets and possible personal injury.

## Special User Groups

Enforcement agencies, which includes government and private organizations, that require their employees to use firearms reserve specific range venues for their training and qualification exercises. Each user group is also provided with a range orientation before use. The user fees assist with the operational costs of the range which keeps membership fees low.

These groups generally use the PPC Range during their work day. When these special user groups are on site, members can continue to use other range venues during the same time period.

Members using handguns may be asked to use the silhouette handgun range to reduce the risk of shrapnel traveling from the falling plates handgun range onto the PPC range.

When youth groups are on site, the range is closed to members and user groups until the youth activity is concluded for the day.

The range may be closed to general use during competitions and when site maintenance is scheduled.

Eye and hearing protection required on all shooting range venues.

Firearms are loaded only when on the firing line

Remember to pick up your spent brass and targets when finished.

## Trap Range

- Shotguns only
- Clay targets only
- Automatic throwers from two trap houses available during scheduled match

Rifle Ranges— Examples of permitted calibers: small bore (rim fire) calibers and large bore calibers such as .300, .308, .338, .375.

- NO .50 cal BMG
- NO binary explosive targets

Bench Rest - 100 yards to 500 meters

- Backboards at 100 yards for paper targets
- Often used for sighting-in scopes or chronographing new loads
- Use of shotguns permitted at 100 yard bench rest area.

Centre Fire Rifle Silhouette - 200 to 500 meters

- Metallic Silhouette Targets on rails
- Metal clangers beside target rails for heavy calibers
- Reactive metal targets at 387 meters (near turkey rail)

Rim Fire Rifle Silhouette - 25 to 100 meters

- Personal metallic spinner targets for rim fire permitted
- No shotguns or centre fire rifle on rim fire range

Handgun Ranges

- Holsters are permitted only on the handgun ranges
- Holstered firearms may be loaded only when on the firing line of the handgun range
- Holsters are not permitted on the indoor range except during a sanc-

tioned event.

PPC (Practical Pistol Course) - 100 yards (104 meters)

- 12 target stands at 50 meters for paper targets
- Upright posts and barrels are not target holders. They are barriers that are part of the PPC shooting discipline.

PPC RANGE SPECIAL NOTES:

- Primary use is handgun.
- All firearms will be shot from the same firing line.
- 100 yard (104 meter) sight-in lane for rifles IF bench rest area is fully occupied and PPC range is unoccupied by handgun shooter
- Carbines and shotguns are permitted

Falling Plates - 44 meters -

- Handguns only
- No rifles or shotguns permitted
- Reactive metal targets
- Eye protection required

Handgun Silhouette - 25 meters to 200 meters,

- No rifles or shotguns permitted
- Rimfire Metallic Silhouette Targets available during scheduled match
- Centre fire metallic silhouette targets on rails
- Free-standing reactive metal targets
- Do not shoot center fire handguns at rimfire targets or rails

Indoor Range

- .22 calibre RF rifles and handguns,
- No magnum loads,
- Air guns permitted, lead pellets only
- Paper targets only - no reactive or metal targets permitted
- Centre fire handguns (lead bullets/target loads) - members must obtain handgun proficiency status
- Indoor range not available when the temperature is minus 30
